19" Equipment Racks

Description

The Premier Acoustic range of rack enclosures and equipment chests are an ideal solution for when a low-cost portable housing system is required. The sides and top of the enclosure are fixed and the rear panel is divided in two halves that can be adjusted and cut for cable access.

Carrying handles are incorporated into the sides making them easily portable and producing a highly efficient method of housing 19" equipment at a fraction of the cost of a standard rack.

They are ideal for small AV systems, background music systems and other applications where space is limited. Chests are available in 6U-24U sizes in 3U increments

Available rack sizes are as follows:

Height	Width (mm)	Depth (mm)
6U	555	550
9U	555	550
12U	555	550
15U	555	550
18U	555	550
21U	555	550
24U	555	550
